

Gas ordering instructions at the Faculty of Medicine

Gases are ordered once a week, on Wednesdays to make transportation costs more reasonable, by concentrating orders from multiple laboratories on a single shipment.

Please send your order request no later than 10:00 am on Wednesday so that we can receive standard gas deliveries on Thursdays or Fridays.

When sending your order to kaasuhankinnat@helsinki.fi, put the following information in the order:

- Which gas and what bottle size. Please give the product code, if you know it
- Do you order the bottle with the fastening service
- Delivery address to which the gas cylinder is to be delivered with room number included
- Who orders, and the subscriber's contact information (telephone) so that Woikoski can contact you, if needed, about importing the bottles.
- Do you have a return bottle/s for transport? If so, where is the bottle located, and how many do you need to have removed

For special/mixed gases, the delivery time has been about 2-3 weeks.

- For mixed gases (x % this and y % that) or other particularly expensive gases, add the H and WBS codes for billing
- Specially ordered (designer) mixed gases always come with a certificate of the contents

Product codes for the most commonly ordered gases

T200077	Carbon dioxide	CO2 40 L/30 kg	DIN 6
T200100	Nitrogen	N2 50 L	200 bar DIN 10 RPV
T200030	Oxygen	O2 50 L	200 bar DIN 6
T200211	Oxygen, medical	O2 50 L	200 bar DIN 6 RPV
T200058	Argon	Ar 20 L	200 bar DIN 10 RPV

You can find all common gases in the Woikoski brochure. Individual mixed gases, are also available as special orders.
